LOCAL DISASTER PREPAREDNESS COMPANY AND INFORMATION TECHNOLOGY FIRM JOIN FORCES TO BECOME THE FIRST FULL SERVICE BUSINESS CONTINUITY AND RECOVERY TEAM IN NEW ENGLAND.

Code Red Business Continuity Services, LLC and UNICOM Technology Group, Inc would like to announce the strategic agreement between the two companies. This agreement offers safety minded businesses and organizations a full service menu of emergency preparedness and business continuity strategies to assist smart business owners and safety managers in the Region.

Businesses today are faced with approximately 35 major disasters in the United States every year according to the Federal Emergency Management Agency. As a result, businesses are now being asked to develop and implement a disaster readiness and business continuity plan that is tested and practiced in the event of a man-made or natural disaster.

The Code Red/UNICOM partnership brings best practice guidance and support to businesses and organizations who want to plan to keep their employees safe, their business operating, and their facility functional across all areas of Life Safety and Information Technology. The Code Red/UNICOM partnership unites previously separate key elements of the planning process and makes an integrated solution available to organizations across New England.

Lori C. Adamo, President of Code Red Business Continuity Services stated, "We are very pleased to be teaming with UNICOM, a recognized leader in Information Technology Services. They bring an added and important service to our clients allowing us to help them be better prepared to manage a crisis. Our powerful team will guide businesses through Emergency Operations Planning and Business Continuity Planning to help create survivability and resilience."

Michael Davis, President of UNICOM stated, "Protecting data and keeping IT systems available during a crisis is meaningless unless we are also helping clients plan for the safety and well being of their people. Lori and her team are Life Safety planning experts. Partnering with Code Red gives us the proven expertise we need to help clients protect their people, keep critical information available and recover quickly from an unplanned emergency."

About UNICOM

UNICOM Technology Group, Inc., located in Woonsocket, RI is a leading Information Technology solutions firm. UNICOM helps clients meet their goals by working to understand their business and then designing and implementing appropriate IT solutions. UNICOM's proven skills and methods help clients communicate and work more efficiently, improve productivity, build and maintain security, improve customer service and control or reduce costs.

UNICOM has been in business for over 70 years and is a Microsoft Gold Certified, Cisco Premier and HP Gold Partner.

About Code Red

Code Red BCS, located in Cranston, RI works with private and public sector business and organizations to guide them towards planning for successful emergency preparedness and recovery. Code Red brings a Life Safety approach to preparedness by helping clients plan for disruption that may be caused by events such as fire, hurricanes, power outage, and most recently the pandemic influenza threat. Code Red's team is comprised of experts who carry with them years of emergency management and business development strategies.

Code Red's plans are developed using Code Red's ACT system – Assessment, Communication and Training. The basis of each and every service that is performed is built on a public/private platform of understanding. No business and no government can do it alone, but together we can build successful disaster planning and business continuity for all clientele.
